

Equipment Agreement

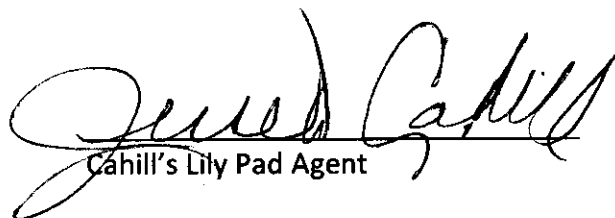

Cahill's Lily Pad, 2879 VA Ave., Collinsville, VA has been established as a LPG fill dispensing station of liquid propane for the sole use of refilling/ resale DOT cylinders and A.S.M.E tanks.

1. The related equipment as of 8-26-20 involves a 1000 gallon fuel storage tank, block foundation, cabinet, pumping assembly, and multiple adaptors. All aforementioned items furnished equipment by Clark Gas & Oil was in safe workable order and properly identified at the time of installation. An initial pair of LP Gas rubber gloves was also supplied. Cahill's Lily Pad will promptly install a minimum 18lb. BC rated fire extinguisher and furnish their employee with a pair of safety glasses or face shield and replace worn safety gloves as needed.
2. An instructional DVD video and CD for the classroom and a list of procedures was reviewed by those employees who will be engaged in the operations of the dispensing station. A copy of the video was left at the facility in order for new employees and others to review at any time. A current copy of the Safety Data Sheet (MSDS) for LPG and other safety information was also left.
3. It is noted that only those Cahill's Lily Pad personnel who are designated and properly trained to refill DOT cylinders and mounted A.M.S.E tanks are to engage in these activities.
1. It is noted that at anytime an unsafe condition occurs with the equipment, further training or questions arise; Cahill's Lily Pad management or staff will immediately suspend the use of the dispensing station and will notify Clark Gas & Oil for assistance.
